* XLC for height up to 160 cm

* XLC for height up to 160 cm

1 installation possible, difficult operation
2 maintaining a distance of 20 cm between windows vertically and a minimum of 4 cm horizontally, paying particular attention to flashings with insulation and non-standard solutions for combinations and flashings (mansard, ridge, etc.)
3 special version of internal accessories required, available upon request
4 special milled handle must be additionally purchased
5 awning blinds upon request; when ordering awning blinds for combinations, please provide information concerning windows (identification label) and roof pitch
6 roller shutter/awning blind available upon request
7 upon request (handle without a "nose")
8 installation place must be changed due to the risk of collision with the screws of window installation bracket
9 limited use
10 installation possible, difficult
11 option to use VMZ awning blinds in all versions - awning blinds upon request
12 operation impossible
13 only for manual version of DMC, DMF, DMG, DMZ windows
14 vertical combinations of AMZ NewLine with maintaining 10 cm distance between windows
15 compatible with windows manufactured after 1998, for windows manufactured before 1998 (non-standard products) - it is required to provide photos of windows with the flashing and window measurements in accordance with the guidelines determined on the basis of photos
16 roller shutter/awning blind available upon request, for combinations with FXP/FPU window, accessories for the upper window must be ordered in a special version
17 accessories in solar version are recommended for Solar windows, for others the power must be supplied to the accessory
18 lining opening maximum height: 240 cm
19 compatible product: XDS 000X
20 compatible product: XLC 000X
21 compatible with windows manufactured since 2007
22 no compatibility with windows featuring upper locking
23 before installing the blind remove the handle holder and fit it again once the blind is installed
24 ZBR lock comes as standard in the window
25 FWR, FWL - ZBH handle (code: 80AZ05), handle in left FWL side hung escape window turned with the holder facing upwards, for window heights of 140 and 160 - two handles as standard
26 FWP - ZBH handle (code: 80AZ05), handle turned with the holder facing upwards in universal left FWP/L, FWU/L, FWW/L side hung escape window; for window heights of 140 - two handles as standard
27 compatible product: XGP 0P0X, XGW 0W0X, XGU 0U0X
28 no compatibility with Solar window
29 no compatibility with FV window featuring a width smaller than 55 cm in version with air inlet

A AKZ connection set in A version must be purchased
B AKZ connection set in B version must be purchased (Please note! For FT…/FP…/FN… windows manufactured before 2007, the A contact version must be purchased)
C AKZ connection set in C version must be purchased
D AKZ connection set in D version must be purchased

** no ARS roller blind for FTT U5 window featuring a width of 46 cm and 48 cm
*** difficult operation
****

In internal accessories for maximum width and height sizes, fabric dropping may occur. It is particularly noticeable with roof pitches below 30 degrees.
This is very subjective as not all customers find this situation bothersome.

FAKRO © For internal use only.
